Delightfully aromatic experiences to inspire your senses

Nexxt Solutions introduces its new **Smart Home Automation Series**. Designed to suit your mobile lifestyle while building a safe environment inside and out your home, the brand seamlessly unifies into one user-friendly application a comprehensive line of fully integrated devices. From smart plugs, power strips, bulbs and cameras to security kits, you can now take control, schedule and run your own home devices, on your own schedule even when you are not there.

Inspired by the new era of IoT, the brand adds the **Wi-Fi aroma diffuser** to its line of innovative Home Automation devices. This 300ml oil diffuser uses electronic frequency technology to produce an ultrafine cool mist with natural essential oils. It is the ideal solution to fill any room with fresh, pleasant aromas while purifying the air naturally. Its classy wood grain finish and 7-color changing LED make this diffuser a must-have for any home, office or spa. It is a safer alternative to candles and incense, and it works fantastic as a night light too as it glows in the dark. It has a safety mechanism to turn the diffuser off when water level runs low. Operates quietly to create a serene and soothing atmosphere while spreading enchanting aromas in areas of up to 60sq.ft.

Highlights

- Smart Wi-Fi aroma diffuser
- Brilliantly-designed, nature-inspired diffuser with ultrasonic technology
- Fits perfectly with any décor
- Provides 10 hours of continuous aromatherapy with a single fill
