in **one app**

## Intelligent light for every part of your life

Nexxt Solutions introduces its new **Smart Home Automation Series**. Designed to suit your mobile lifestyle while building a safe environment inside and out of your home, the brand seamlessly unifies into one user-friendly application a comprehensive line of fully integrated devices. From smart plugs, power strips, bulbs and cameras to security kits, you can now take control and run your home devices, on your own schedule even when you are not home.

With our **Smart Wi-Fi LED** bulb you can easily bring life to your room or set the mood directly from your smart device. Remotely turn your lights on and off from anywhere via the Nexxt Solutions Home app. By adopting the **CCT (Correlated Color Temperature)** technology, users can now create the right ambiance with virtually all shades of white, from bright and invigorating to a smooth and inviting type of light. Setup is a snap: simply screw LED bulb into any standard socket or lamp holder, and connect it to your existing wireless network, *no hub required*. Its voice activation feature makes it compatible with Google Assistant and Amazon Alexa for hands-free management of all linked devices. You can have peace of mind by checking the real-time status of any device at any time, save energy by running your house on your schedule, while providing a higher sense of security by making it appear that you are home even though you are half way around the world.

## Highlights

- Easy pairing
- Nexxt Solutions Home app
- Voice activated (Amazon and Google Assistant)
- iOS and Android™ compatible app
- Schedule on and off times from anywhere, anytime
- Set up timers and automation routines for illumination cycles, at the touch of a button
- Attractive vintage-style filament bulb, perfect for decorative lighting applications
- Radiates a warm, glamorous glow which perfectly balances its classic appeal with the modern reliability and energy savings of LED technology
- Set the mood of any room by customizing the color temperature that fits your space
- Up to 85% more energy efficient than conventional incandescent bulbs
- Share access with family and friends
