

Smart Wi-Fi LED RGBIC light strip

Highlights

Nexxt Solutions keeps expanding its **Smart Home Automation Series**. Designed to suit your mobile lifestyle while building a safe environment inside and out of your home, the brand seamlessly unifies into one user-friendly application a comprehensive line of fully integrated devices. From smart plugs, power strips, bulbs and cameras to security kits, you can now take control and run your home devices, on your own schedule even when you are not home.

Our **Wi-Fi Smart LED Light Strip** allows you to light up any room or even transform the mood directly using your mobile device, wherever you are. With a multicolor spectrum, made up of millions of possible combinations, you can create a different atmosphere at home, in your office or anywhere you want. Get ready to project your style with dynamic colors that dance to the rhythm of your favorite songs. Installation is really easy: just plug the Wi-Fi LED light strip into a standard electrical outlet and connect it to your existing wireless network. You don't need a hub. Voice activation also makes it compatible with Amazon Alexa, Google Assistant and Siri. The adoption of IC chips for segmented control of LED lights makes it possible to select multiple colors simultaneously, turning any space into an expression of your own self.

- **Versatile decorative LED strip** that enhances any decor with sparkles of light.
- **Multicolor DIY lighting** so you can let your imagination run wild creating your own light scenes.
- Its **RGBIC technology** allows to reproduce several colors at the same time through segmented IC LED controls. You can also choose any shade of white, from the warmest to the coolest on the scale.
- **Music sync** will bring your playlist to life with dynamic lighting effects.
- **Interact with your home** from anywhere in the world through the application.
- **Transform the environment** with more than default 44 lighting scenes or create your own one.
- Form groups to link multiple LED lights or lamps together to instantly create a captivating atmosphere throughout your home.
- Configure automated scenes with other smart products from the Nexxt Home ecosystem
- Convenient voice control via Siri, Amazon Alexa or Google Assistant
- Program schedules to turn on, increase or dim the light, with just the push of a button
- Shared access with family and friends
- Easy pairing

Smart Wi-Fi LED RGBIC light strip

Technical specifications

MPN	NHB-S613
General	
Color	RGBIC + warm to cool white light spectrum
Brightness	1,000 lumens
Watts	24W
Dimmer	Through the app
Operating modes and scenes	Up to 16 million color combinations + 4 configurable multicolor scenes
