Intelligent lighting for every part of your life

Nexxt Solutions is expanding its **Smart Home Automation Series**. Designed to suit your mobile lifestyle while building a safe environment inside and out of your home, the brand seamlessly unifies into one user-friendly application a comprehensive line of fully integrated devices. From smart plugs, cameras, bulbs and appliances to a variety of smart switches, you can now take control and run your home devices, on your own schedule even when you are not there.

With our S**mart Wi-Fi LED downlight**, you can easily bring life to any room or set the mood directly from your smart device. Remotely turn the light on and off from anywhere via the Nexxt Solutions Home app. By adopting the **CCT** (Correlated Color Temperature) technology, users can now create the right ambiance with virtually all shades of white, from bright and invigorating to a smooth and inviting type of light. Setup is a snap: simply use the spring clips to snap the fixture into place, and connect it to your existing wireless network, no hub required. Its voice activation feature makes it compatible with the Google Assistant, Siri and Amazon Alexa for hands-free management of all linked devices. You can have peace of mind by checking the real-time status of any device at any time, save energy by running your house on your schedule, while providing a higher sense of security by making it appear that you are home even though you are halfway around the world.

Highlights

- A textured recessed white light designed to provide a gorgeous glow
- Ideal for residential and light commercial applications
- Featuring spring action clips and a separate junction box, it can be installed anywhere
- Create groups to link multiple lights, and control all of them with a single command
- Configure home automation scenes with other smart products of the Nexxt Home ecosystem
- Schedule your preferred time to turn on, brighten or dim your lights, at the touch of a button
- Easy pairing
- iOS and Android™ compatible app
- Create engaging spaces – choose a vibrant daylight color to stay focused or a calm, soft light when it´s time to relax
- Full-tunable color temperature scale -from warm all the way to cool white light
- The brightness of every hue of white is dimmable through the application

Smart HOME. Smart living
