

Smart Wi-Fi baby monitor

Your home
in **one app**

The smart choice for new moms

Nexxt Solutions is expanding its **Smart Home Automation Series**. Designed to suit your mobile lifestyle while building a safe environment inside and out of your home, the brand seamlessly unifies into one user-friendly application a comprehensive line of fully integrated devices. From smart plugs, cameras, bulbs and appliances to a variety of smart switches, you can now take control and run your home devices, on your own schedule even when you are not there.

Whether you're a first-time parent or you're welcoming another baby into your family, a baby monitor offers peace of mind. A **Smart baby monitor** lets new parents keep a watchful eye on the baby's room from anywhere they need to be. The combination of high-definition video with motion detection and a 107-degree viewing angle allow parents to relax while the baby sleeps as they go about their daily tasks. It is easy to set up, and once configured, the monitor stays reliably connected to your Wi-Fi-network. No hub required. Thanks to the built-in microphone and speaker, the baby can hear the sound of your voice so you can comfort your newborn from afar using the app. The baby monitor comes with a host of smart features, such as a temperature sensor, feed timer, and soothing lullabies. Integrated night vision focuses on areas of the room you would like to see more clearly even in complete darkness. Get more nights of sleep knowing that you can rely on an extra set of eyes that never blinks, so you will not lose sight of the little guy!

Highlights

- The flexible holder allows to wrap the monitor around the crib or a pole. To place it on a shelf, or mount it to a wall or ceiling, use the supplied stand
- Features 2K resolution for impressive image quality and color accuracy
- Two-way audio to speak to your baby through a secure connection
- RGB LED light that is fully managed from the app
- Auto infrared night vision. Crisp and clear images for easy check-ups in low light conditions
- Easy setup with no hub required, so you can start monitoring your little one in minutes
- Thermal and humidity sensor accurately monitors the room temperature and notifies you when it goes above or below the set limit
- Motion and noise detection. Get instant alerts every time the baby cries or needs attention
- Everyday reminders for all that matters, from meals and nap times to diaper checks
- Choose from seven different lullabies that will help your little one fall asleep faster
- Cloud ready. Increase the storage capacity of the camera through a subscription plan
- Local storage through a microSD™ card of up to 128GB*
- Supports remote viewing on your smartphone or tablet on both, iOS and Android™ platforms

*Smartphone and microSD™ card not included

Smart Wi-Fi baby monitor
