Smart Wi-Fi® PTZ
Baby monitor

NHC-B200 ST

User guide

Thank you for purchasing the Nexxt Home Smart Wi-Fi® PTZ Baby monitor. We are excited to help make your life easier, safer, and bring peace of mind to your home.

Before you open the box, please read this guide thoroughly so you can get the most out of your new device.

1. What's in the box

- Smart camera
- Silicone head cover
- USB-C® power cable
- Power adapter

If any of the listed items are broken or missing, contact us immediately. Go to www.nexxtsolutions.com/connectivity/support/contact-us, where you'll find several ways to get in touch with our support team.

2. A quick view to the camera

Front view

TF/microSD™ card slot (Detail)

1. LED
2. Lens
3. Built-in microphone
4. TF/microSD™ card slot
(Not visible, located on the lower part of the camera head (see detail). Rotate the camera head upwards to access the slot); Supports local storage of up to 128GB.
5. LED ring light for Light Mode

Rear view

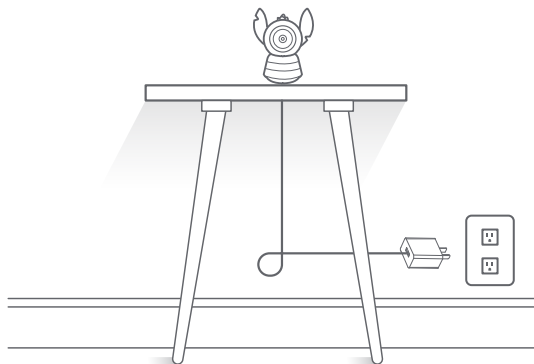

6. USB-C® charging port with built-in temperature sensor (see detail)
7. Speaker: It allows your voice to be heard through the camera at home.
8. Reset button (see detail). Press and hold this button to reset the device. All settings will return to factory default.

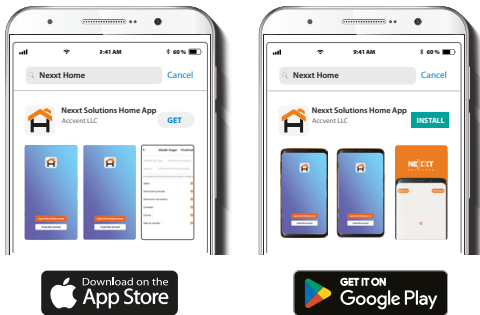

Plug in and turn on the camera

Plug the corresponding end of the USB-C® charging cable into the Type-C power port on the rear side of the camera and plug the other end into the power adaptor. Then plug the power adaptor into a wall outlet. A tone will indicate the camera is ready to pair to your Wi-Fi network.

If the camera fails to connect to your Wi-Fi network, it needs to be reset. Press and hold the reset button on the back of the camera for 5-8 seconds. Then wait until you hear a tone (it may take a few more seconds); the tone indicates the camera has returned to factory reset and is ready to reconnect.

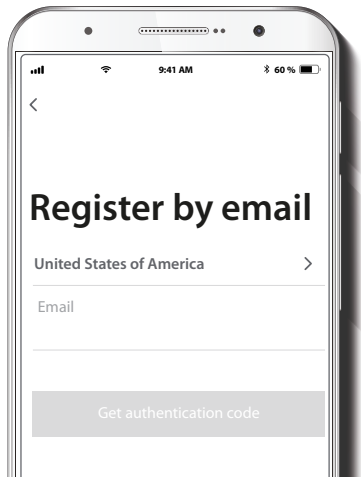

Installing the Nexxt Home App

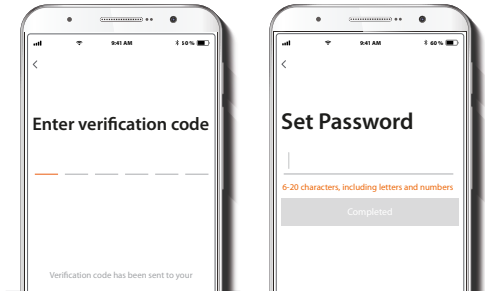

Download the Nexxt Home app on Google Play or Apple App Store.

Step 1

Register by email. Fill in the required fields.

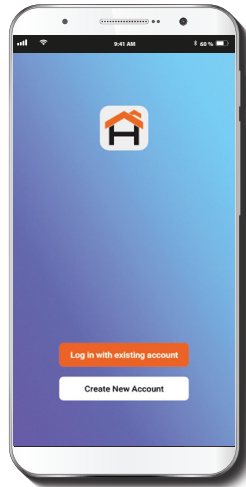

Step 2

Enter the verification code you received.

Create a new password and then select **Completed**.

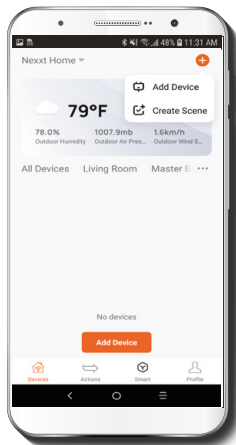

Step 3

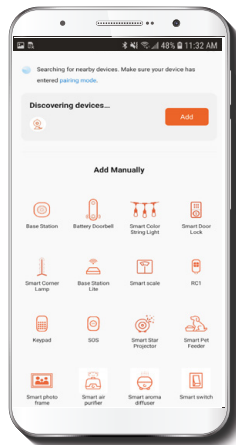

The Nexxt Solutions Home account has been successfully set up.

Add device

Step 1

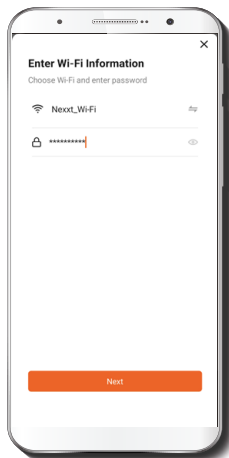

Open the app. On the main interface, tap the "+" sign inside the orange circle in the upper right corner and select "Add Device".

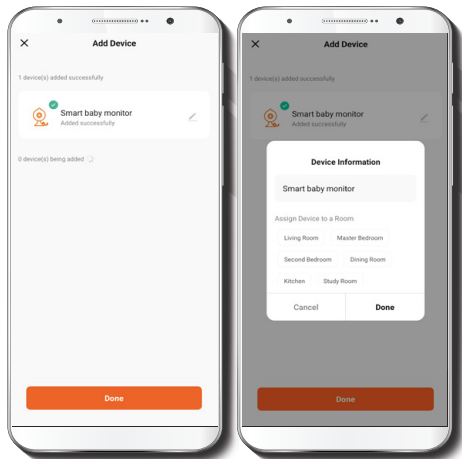

The app will automatically detect the smart baby monitor and display its corresponding icon. Then, tap "Add".

Step 2

The smart baby monitor supports dual-band network connection, so you can link it to 2.4 GHz or 5.0 GHz Wi-Fi networks interchangeably. Select the Wi-Fi network you want to connect it to and enter the correct password.

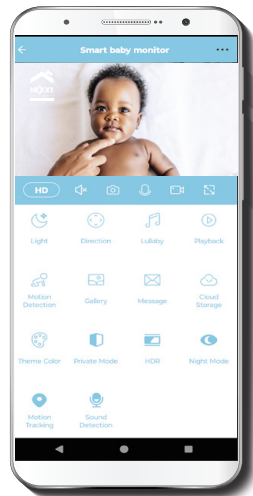

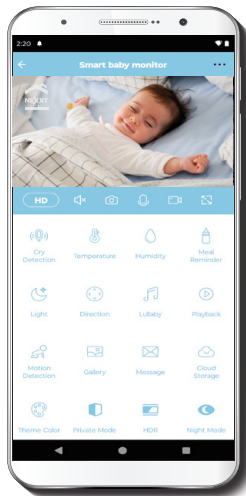

Step 3

If pairing is successful, the notification **Added** will be displayed on the screen.

Click on the pencil icon to rename the baby monitor, select a location or a different icon, and then tap **Done** to store your settings.

Baby monitor interface

••• **Settings:** Access to additional monitor parameters

 **HD/SD:** Switches between High Definition and Standard Definition

 **Mute:** Disables the microphone function on the monitor.

 **Screenshot:** Takes a picture of what the camera is viewing.

 **Speak:** Allows voice communications through the microphone on the phone.

 **Record:** Starts recording a video.

 **Full screen:** Switches to full screen mode.

 **Private mode:** It switches the camera to sleep mode to give users peace of mind about their privacy by blocking the lens, as well as the recording and microphone functions when they are at home.

 **Night vision mode:** Automatically turns on the infrared light to offset insufficient light conditions, enhancing the camera's capacity to see movement at night.

 **Motion tracking:** The camera tracks anyone moving within its field of view.

 **Sound detection:** Activates the sound detection mode.

 **Direction:** Controls the pan and tilt angle of the PTZ camera.

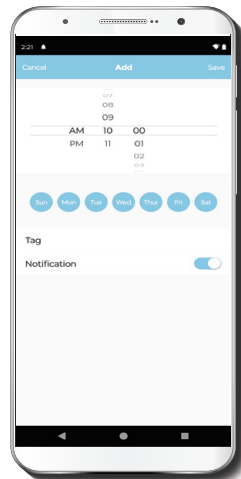

Temperature sensor

Get notified every time the ambient temperature goes above or below the set range. The sensor can be configured to display the temperature using the Celsius (C) or Fahrenheit (F) scale.

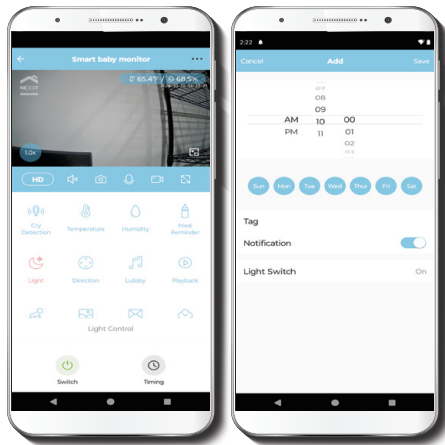

Meal reminder

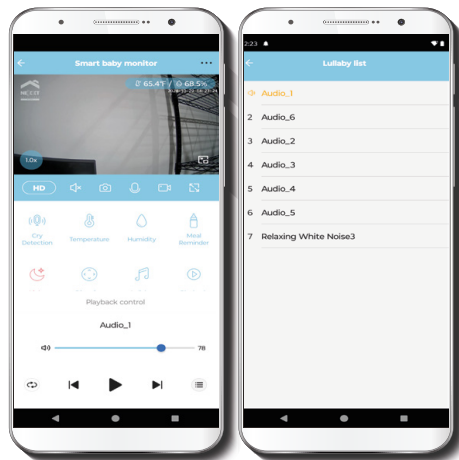

Set notifications to feed your baby on time according to the feeding plan you set.

 Light mode

Controls the RGB LED ring, allowing the selection of the color, saturation, and brightness level of the light, in addition to on/off cycles.

 Lullab

This feature allows the selection of 7 pre-stored melodies and the control of playback functions.

Other special functions

Cry detection: Receive instant alerts on your phone when the baby cries or needs attention.

Humidity sensor: Get notified every time the humidity level in the room goes above or below the set range, to keep the baby in a comfortable environment.

Playback: If a microSD™ is installed, you can use the playback function to watch recordings.

Motion detection settings: Turns the motion detection feature on and off.

Gallery: Presents a list of all recorded videos and photos stored locally or in the Cloud.

Messages: A quick way to view the list of push notifications sent to your mobile device.

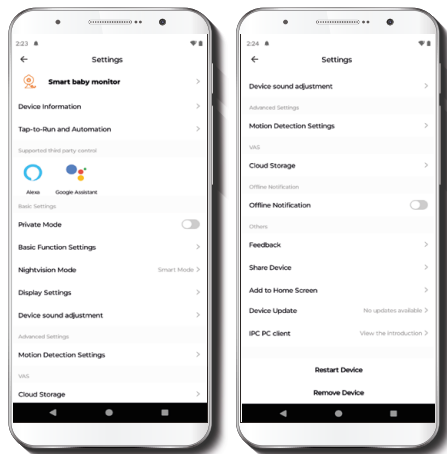

Cloud storage: For added storage capacity, check our cloud services available through a subscription.

Theme color: Allows users to customize the appearance of the interface by switching to either the pink or light blue mode.

Device settings

Settings menu

The general settings interface offers a menu of additional camera functions you can enable, disable or adjust through the app. Below a brief description of some of them:

Device information: This submenu will display key information about the smart baby monitor.

Tap-To-Run and Automation: Links the baby monitor with other smart products to automatically control them through a customized command.

Private mode: It switches the smart baby monitor to sleep mode to give you privacy by blocking the lens, recording and microphone functions.

Offline Notification: When enabled, a notification will be triggered after 30 minutes of the device being offline. You can enable or disable this feature at any time.

Feedback: Please let us know if you have any issues setting up or using the product.

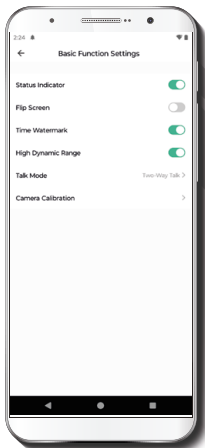

Share device: Give other members of your family access to your smart baby monitor. They will need their own Next Home account to access the device.

Add to Home Screen: This feature adds a device shortcut to your phone's home screen.

Device Update: Adds new features or provides firmware updates and keeps the log for your reference. You can choose automatic updates.

Remove device: Use this feature to unpair the device from your Next Home account.

Basic function settings

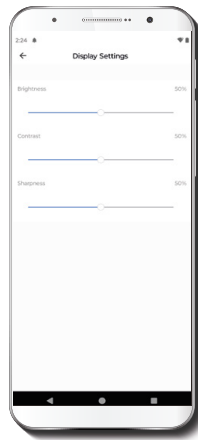

Flip screen: flips the image 180 degrees, if the camera is mounted upside down.

Time watermark: enables and disables the time and date stamp shown in real time while streaming, or on the recorded videos and photos.

Talk mode: allows either one-way or two-way speech.

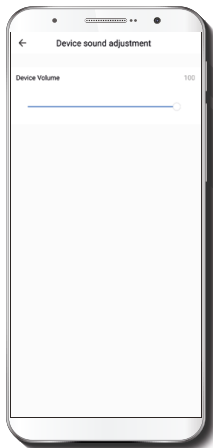

Camera calibration: Allows you to calibrate the camera for the best possible video capture.

Display settings

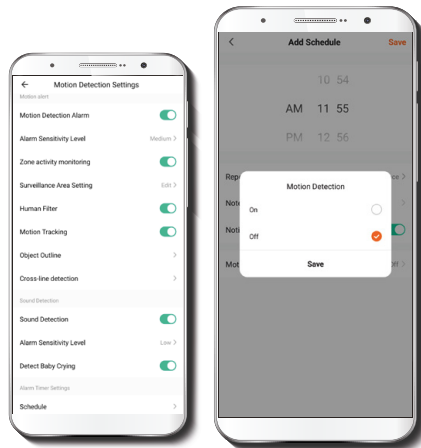

Display settings: Customize screen brightness, contrast and sharpness to the desired level.

Device sound adjustment

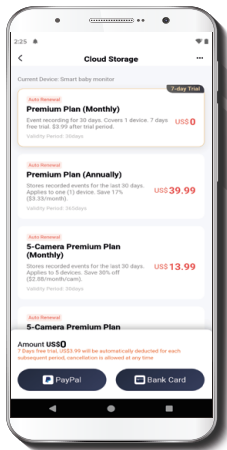

Adjust the volume of the smart baby monitor to the desired level.

Motion detection settings

This important submenu allows you to customize the alarm settings. Adjust the sensitivity levels of the motion and sound detection sensors. Configure filtering and tracking of detected moving people and detect when your baby is crying. Create schedules to enable or disable these features as per your convenience.

Cloud storage

Nexxt Cloud: Access all your photos and videos captured by your smart baby monitor at any time and from anywhere with an optional subscription plan to our Cloud service.
