Your home
in **one app**

The easiest way to make your existing lights smart

Nexxt Solutions introduces its new **Smart Home Automation Series**. Designed to suit your mobile lifestyle while building a safe environment inside and out of your home, the brand seamlessly unifies into one user-friendly application a comprehensive line of fully integrated devices. From smart plugs, cameras, bulbs and photo frames to a variety of smart switches, you can now take control and run your home devices, on your own schedule even when you are not there.

Customizing your lights and favorite scenes has never been easier! Designed to upgrade conventional single-pole light controls, our **Smart Wi-Fi 3-circuit switch** can be quickly installed and integrated into your existing wireless network, no hub required. Boasting a modern design along with its fire-retardant construction, this switch emerges as a great addition to any room in the home. Since it´s powered by the Nexxt Solutions Home app, users can remotely monitor their lights, fixtures or appliances and set on/off times using a smartphone, at any time and from anywhere. Its voice activation feature makes it compatible with Google Assistant and Amazon Alexa for hands-free management of all linked devices. You can have peace of mind by checking the real-time status of any appliance at any time, save energy by running your house on your schedule, while providing a higher sense of security by making it appear that you are home even though you are halfway around the world.

Highlights

• Smart 3-circuit light switch – boasting a modern and space-saving design
• Convenient 3-in-1 solution- allows the connection of three separate fixtures
• Each switch can be individually managed and configured
• Designed for energy-efficient LED and conventional bulbs
• Manual and remote on/off controls through the app
• Nexxt Solutions Home App
• iOS and Android™ platform compatible
• No hub required
• Easy pairing
• Voice activated: utter simple commands using your favorite voice assistant
• Create schedules: turn lights and connected loads on or off at specific times, or based on sunrise - sunset cycles
• Push-button with LED to locate the switch in the dark
• Multiple programmable timers
• Share access
