# Smart Wi-Fi single plug

**Compact design**

Multiple timers

Voice control

Create schedules

No hub required

Easy to share access

**2-year warranty**

Your home in **one app**

## Turn any device into a smart device

As part of Nexxt's home automation series, the **Wi-Fi Smart Plug** NHP-S611 is designed to turn your regular home appliances into smart devices. Plug it into the wall and integrate it into your existing wireless network with the Nexxt Home app.

Turn the plug on or off and schedule its operating hours as you want. Your smart plug will allow you to control a lamp, your coffee machine, a TV set and any home electric device, from anywhere. You'll be able to better control their usage time and thus save energy. In addition, you'll gain in security: turning your lights on and off will give the impression that there is always someone home, even if you are away.

## Highlights

• Voice control
• Compatible with Alexa, Google Assistant and Siri
• Remote management using the Nexxt Home app
• Create your own schedules
• Multiple programmable timers
• Plug interacts with other Nexxt Home smart devices
• Compact design
• No hub required
• Easy pairing
• iOS and Android™ compatible app
• Easy access sharing
