

Smart Wi-Fi door lock

Multiple locking and unlocking modes

Your home
in one app

Unlock the future. Turn your smartphone into your house keys

Nexxt Solutions is expanding its **Smart Home Automation Series**. Designed to suit your mobile lifestyle while building a safe environment inside and out of your home, the brand seamlessly unifies into one user-friendly application a comprehensive line of fully integrated devices. From smart plugs, cameras, bulbs and appliances to a variety of smart switches, you can now take control and run your home devices, on your own schedule even when you are not there.

Everyday life gets easier thanks to the cutting-edge technology of the **Smart Wi-Fi door lock**. There is no need to hide your keys under the mat anymore. It's fast and easy to install, no locksmith is needed, comes complete with the required hardware, and it is also compatible with both left and right-handed doors. Once installed, you can connect the door lock to your existing Wi-Fi network, *no hub required*. Better yet, a variety of access options over a secure connection are available through the free Nexxt Home App. Featuring an illuminated touchpad, it eliminates the hassle of fumbling around for your keys. Focused on strength and durability, this stylish deadbolt is designed to complement any décor with its classic black or contemporary stainless-steel finish. When you upgrade your conventional lock and key system to this tamper-proof smart deadbolt, you will never have to worry again about someone entering your home unauthorized when you are not around.

Highlights

- **A whole new level of security and convenience:** never worry about lost, stolen or forgotten keys again
- **Multiple ways to unlock your door:** mechanical key, digital key, through the app or voice control
- **Smart home ready:** use voice commands to remotely lock or unlock your front door
- **Know what's happening:** get alerts every time someone enters or leaves your home
- **Monitor past lock activity:** check if the kids arrived home on time
- **Autolock:** set the smart deadbolt to automatically lock your door on your way out
- **Easy management:** check the status of the deadbolt and access activity records/logs, including wrong passcode attempts in real time
- **Unique passcodes:** generates timed, permanent, one-time or customized PINs and share them with guests, friends, housekeepers or service personnel
- **Create automation scenes:** enables the control of multiple smart devices with just a tap
- **USB powered backup:** unlock your smart door lock using a power bank when it runs out of power
