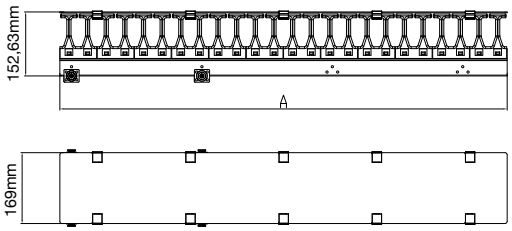
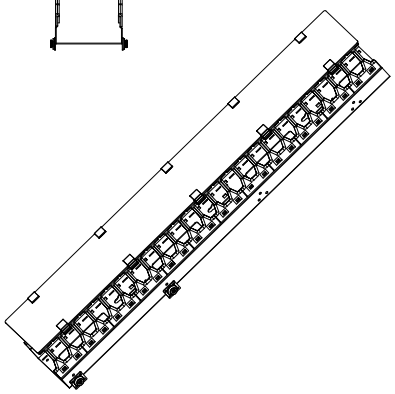
Vertical cable management system
with hinged doors, right or left side

7ft

NPM-DV7FB





The Nexxt Solutions cable management system is designed for superior cable organization, by allowing increased cable density for maximum space utilization and enhanced system appearance. By creating a vertical pathway, cables are conveniently routed through the channel, while increasing the manageability and control of your installation. Hinged doors also provide easy access to the cables inside the vertical pathway. Pass-through holes promote adequate bend radius, ensuring network performance and reliability.

- Follows ANSI/TIA/EIA-568 C.2 manufacturing standards
- One layer of electrostatic coating protects it against humidity, rust, scratches, peeling, strong acid and alkaline erosion
- Black epoxy-polyester hybrid powder paint
- For indoor use only, in environmentally controlled areas, may not be used outdoors, in industrial or harsh environments or in plenum spaces
