

## NPP-S11UB5

## **Blank panel**

Our blank panels are designed to fill the open spaces left unused on a standard EIA 19-inch rack. Constructed of cold-rolled steel with black powder coated finish, this metal filler panel provides the protection your valuable networking equipment needs. It works as a seal to prevent hot air recirculation between rack units, while providing a clean, finished look to your installation. Each pack contains 5 panels.

## **Highlights**

- 1U blank panel kit compatible with standard 19in server racks and enclosures
- Includes 5 panels for covering up to 5 empty RU spaces
- By covering unused rack spaces, blank panels prevent hot air re-circulation, thus maximizing airflow and cooling efficiency inside the enclosure
- Energy-saving solution for cabinets, smart data centers, and telecommunication rooms
- Convenient, it holds the space until further expansion is needed
- Meets ANSI/TIA/EIA 568.C.2; UL60950 industry standards
